FASTOO

V5 PRO

ONE PLATFORM. EVERY OPERATION. POWERED BY AI.

New Logistics System Rebuilt From the Inside Out

FASTCOO

A New Version of Fastcoo, Rebuilt From the Inside Out

Not just a new interface.
A faster, clearer, and smarter way to manage logistics operations.

Cleaner New Interface
Faster navigation and a more modern user experience.

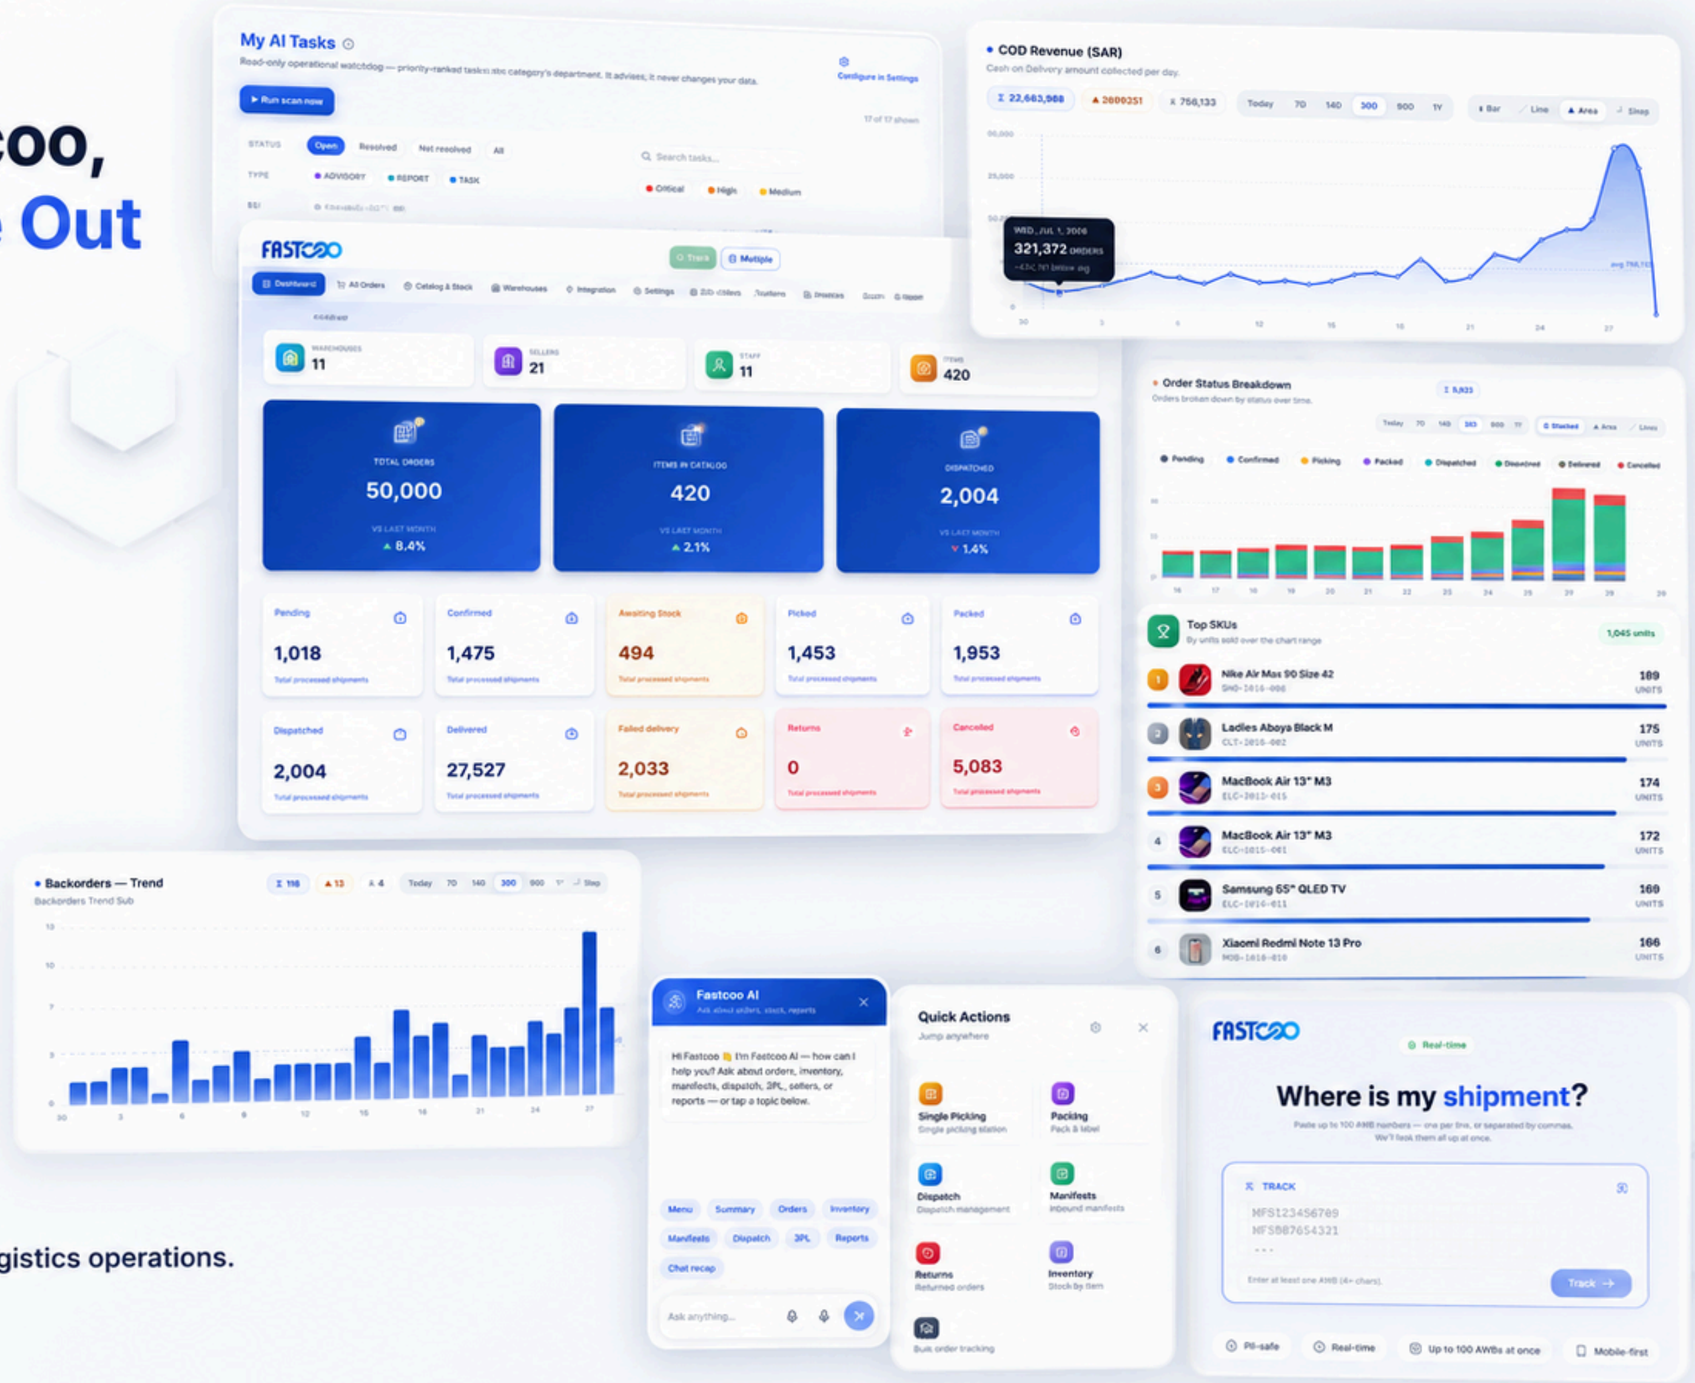

Unified Operations
Orders, warehouses, reports, tracking, invoices, and last mile in one platform.

Smarter Dashboards
Live operational visibility with richer reports and performance insights.

Warehouse Control
Better oversight across fulfillment, inventory, dispatch, and exceptions.

Automation & AI
Quick actions, AI tasks, alerts, and operational recommendations.

Built to Scale
Designed for multi-warehouse, multi-team, and high-volume operations.

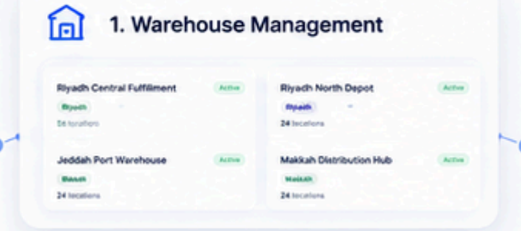

One platform to manage, automate, and control your logistics operations.

FASTCOO

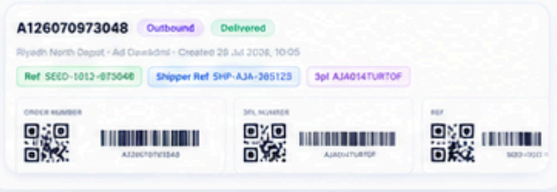

One Platform.
Every Logistics Operation.

No disconnected tools. No fragmented data.
Every operation works together inside one platform.

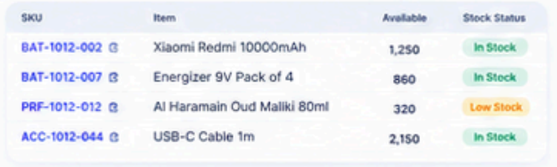

1. Warehouse Management

2. Order Management

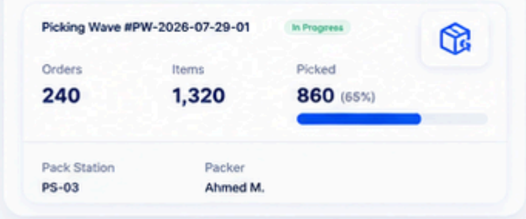

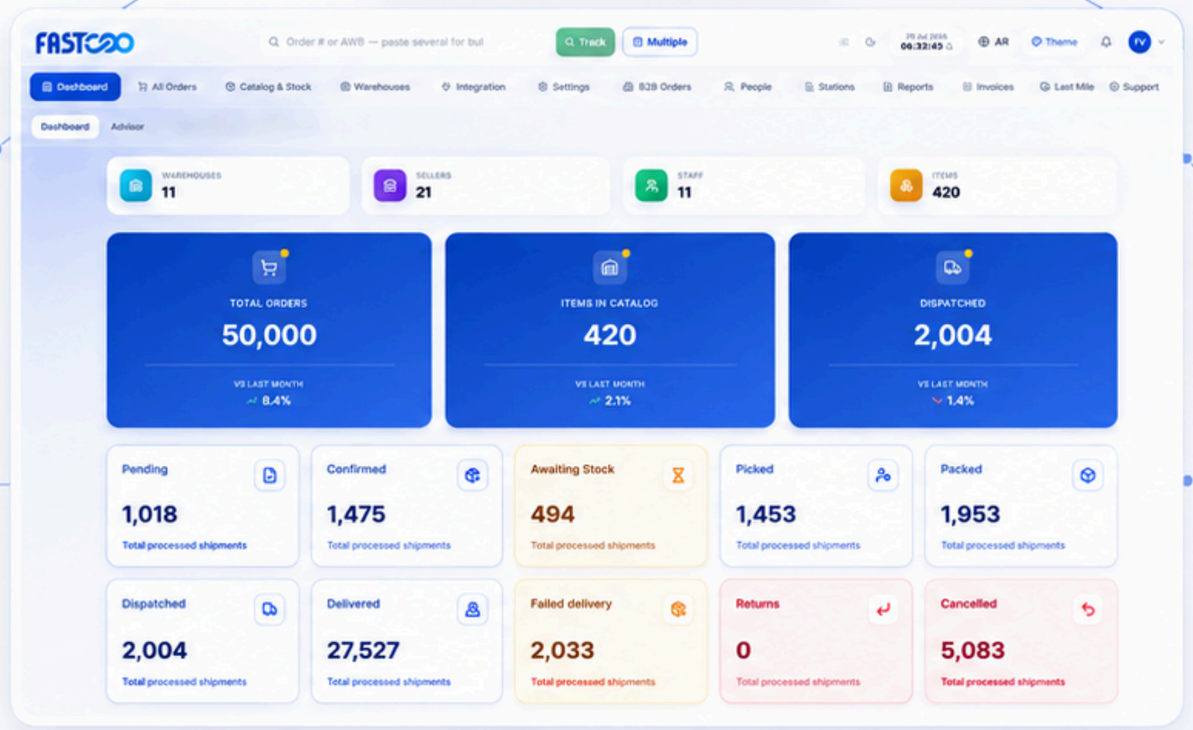

3. Inventory Control

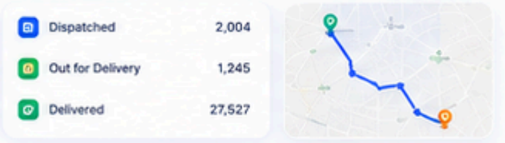

SKU	Item	Available	Stock Status
BAT-1012-002	Xiaomi Redmi 10000mAh	1,250	In Stock

PRF-1012-012	Al Haramain Oud Maliki 80ml	320	Low Stock
ACC-1012-044	USB-C Cable 1m	2,150	In Stock

4. Picking & Packing

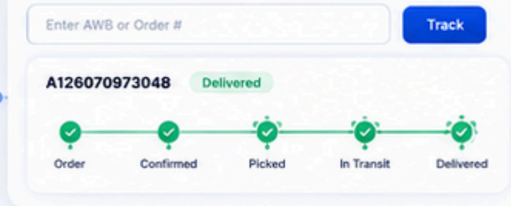

5. Dispatch & Last Mile

6. Tracking & Returns

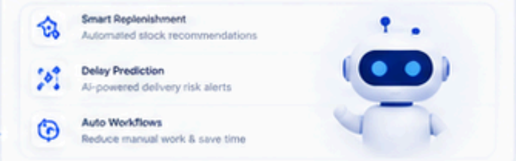

7. Reports & Finance

8. Integrations

9. AI & Automation

From inventory receiving to final delivery — fully connected, visible, and controlled.

FASTCOO V5 Pro

Manage Every Warehouse From One Place

One view for every warehouse, location, team, and operational issue.

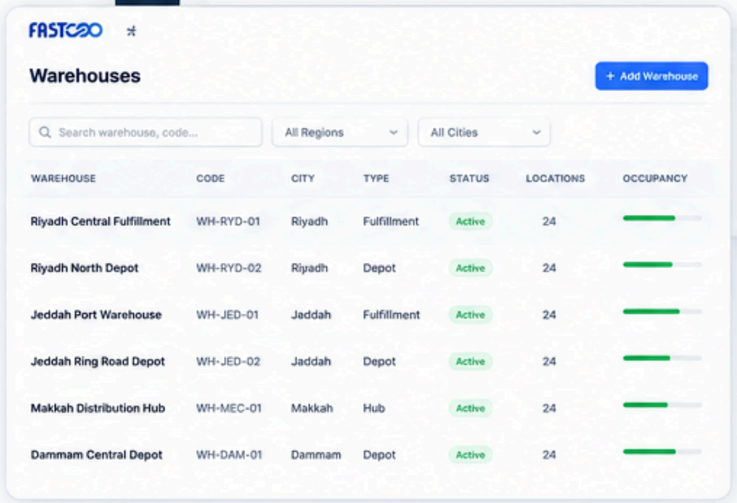

Multi-Warehouse Control
Manage all sites, cities, and fulfillment centers centrally.

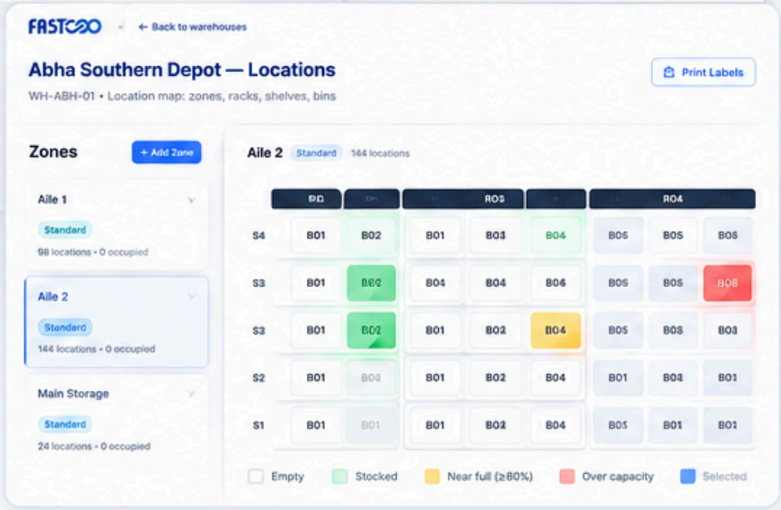

Live Operations
See open queues, stuck orders, dispatch, and team performance in real time.

Exact Location Mapping
Every zone, rack, shelf, and bin has a clear digital address.

Capacity Visibility
Know what is occupied, empty, near full, or over capacity.

Your entire warehouse network — visible, connected, and under control.

Know Exactly What You Have. And Where It Is.

Real-time inventory visibility across every warehouse, location, batch, and stock status.

Multi-Location Inventory

One SKU can be tracked across multiple warehouses and locations.

Batch & Expiry Control

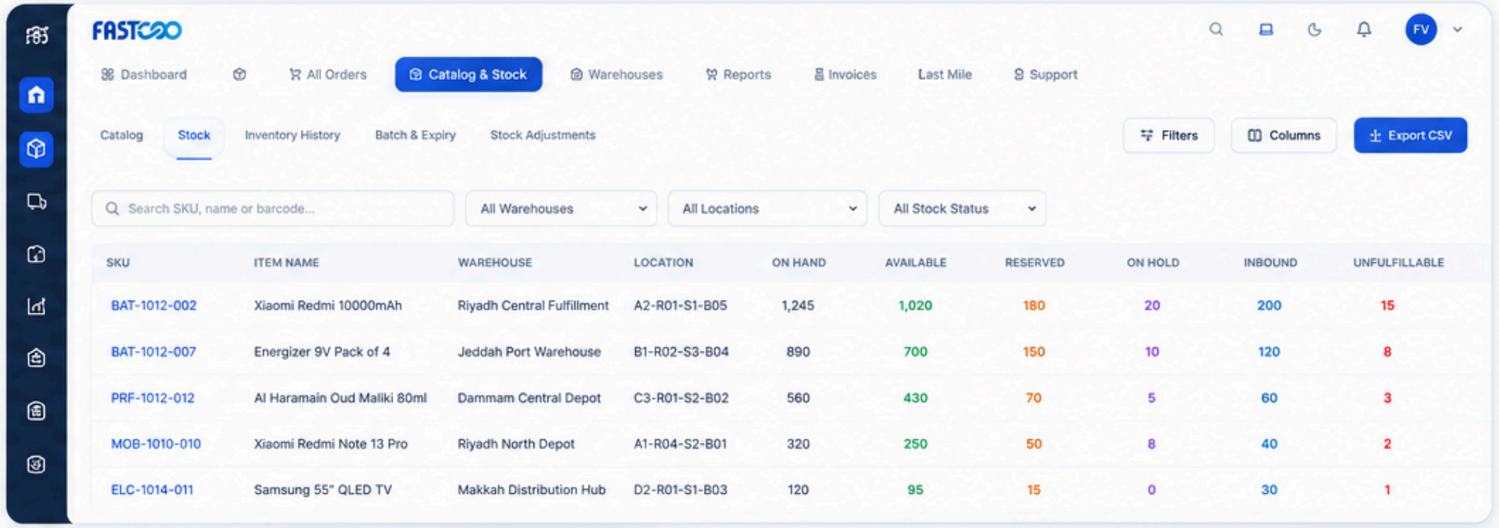

Track batches, expiry dates, and stock rotation using FIFO, LIFO, or FEFO.

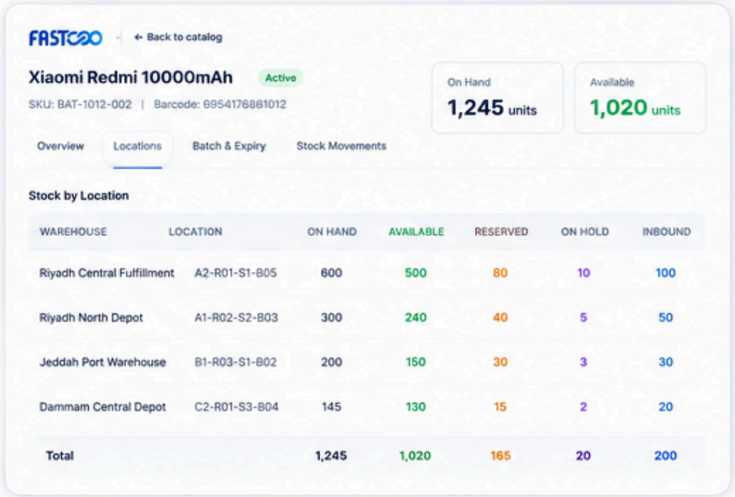

Full Movement History

Every adjustment, receipt, reservation, pick, and dispatch is recorded.

Fewer Stock Errors

Identify mismatches, shortages, and slow-moving stock before they affect orders.

TOTAL SKUS 8,934 Active SKUs

ON HAND 2,458,761 Units

TOTAL VALUE 18,735,420 SAR At cost

EXPIRING SOON 1,245 Units (30 days)

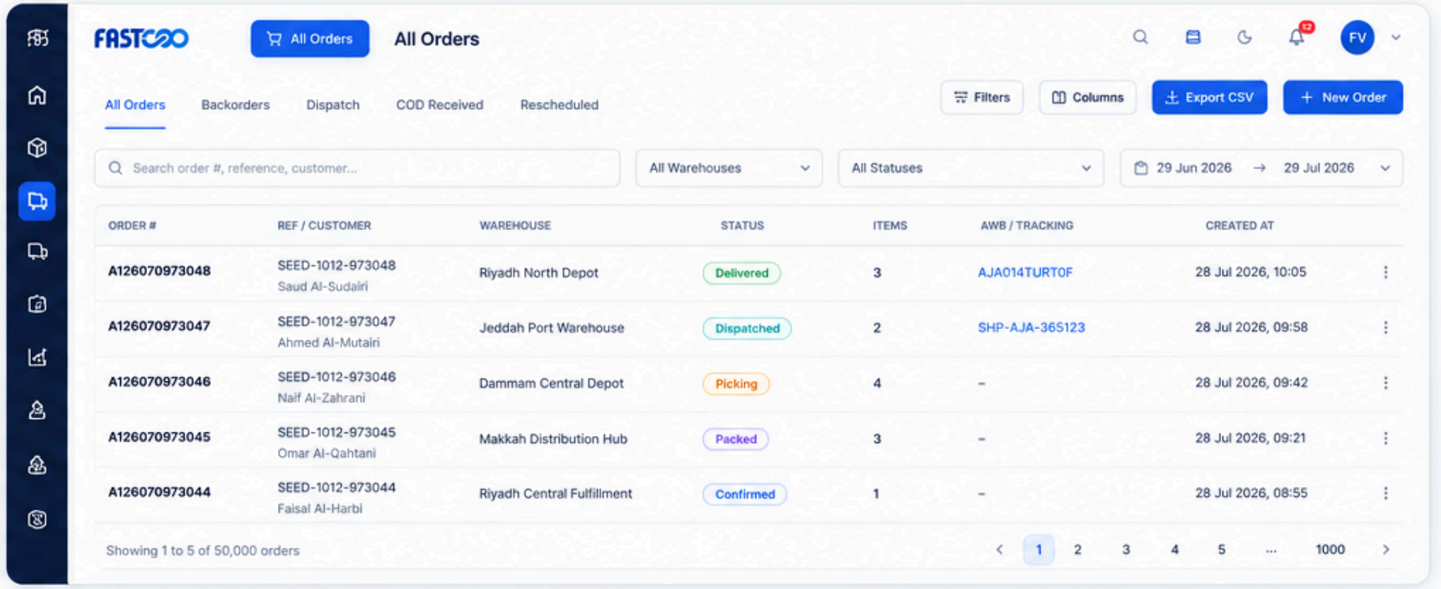

SLOW MOVING 2,033 SKUs

Not one inventory number. The complete, accurate picture.

From Order Created to Delivered. One Clear Flow.

Every order moves through a visible, controlled, and traceable process.

Created › Confirmed › Picking › Picked › Packed › Dispatched › Delivered

Clear Order Lifecycle

Every stage is visible from creation to final delivery.

Bulk Operations

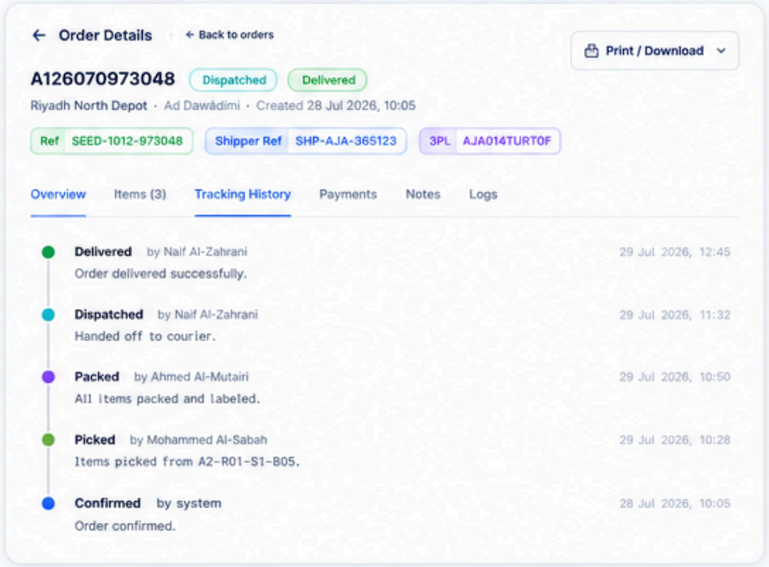

Pick, pack, dispatch, and update large batches faster.

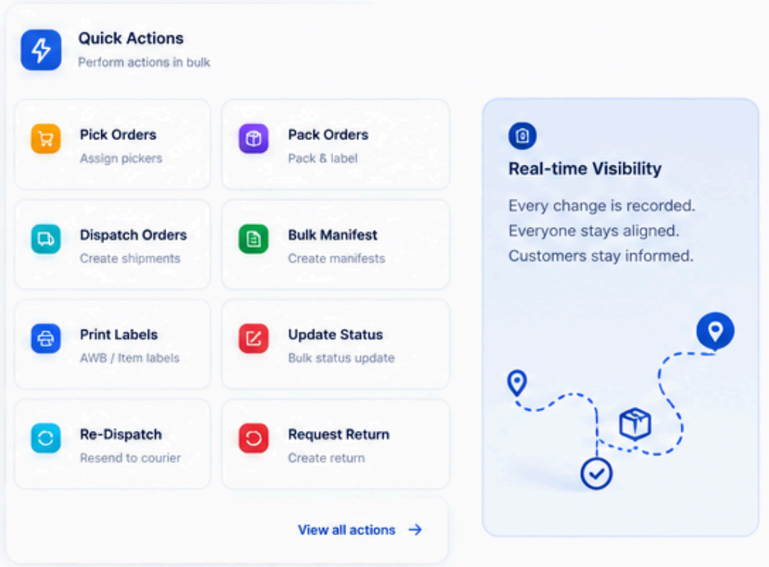

Full Accountability

Know who picked, packed, dispatched, and changed each status.

Re-Dispatch & Returns

Returned or failed orders can move back into a controlled workflow.

One order. One history. No hidden steps.

FASTOO V5 Pro

See Your Operation Live. Not After It Happens.

Real-time visibility across orders, teams, warehouses, dispatch, and SLA performance.

Live Operational KPIs
See orders received, open queues, dispatched orders, stuck orders, and returns instantly.

Team Performance
Know who is picking, packing, and dispatching fastest.

SLA Visibility
Spot delays and bottlenecks before they affect customers.

Management View
One screen for every warehouse, seller, team, and service level.

No delayed reports. No blind spots. Just live operational control.

Know What Makes Money. And What Does Not.

Real-time financial visibility across fulfillment, last mile, COD, clients, warehouses, and service lines.

Revenue by Service

Separate fulfillment, storage, last-mile, and value-added service revenue.

Client Profitability

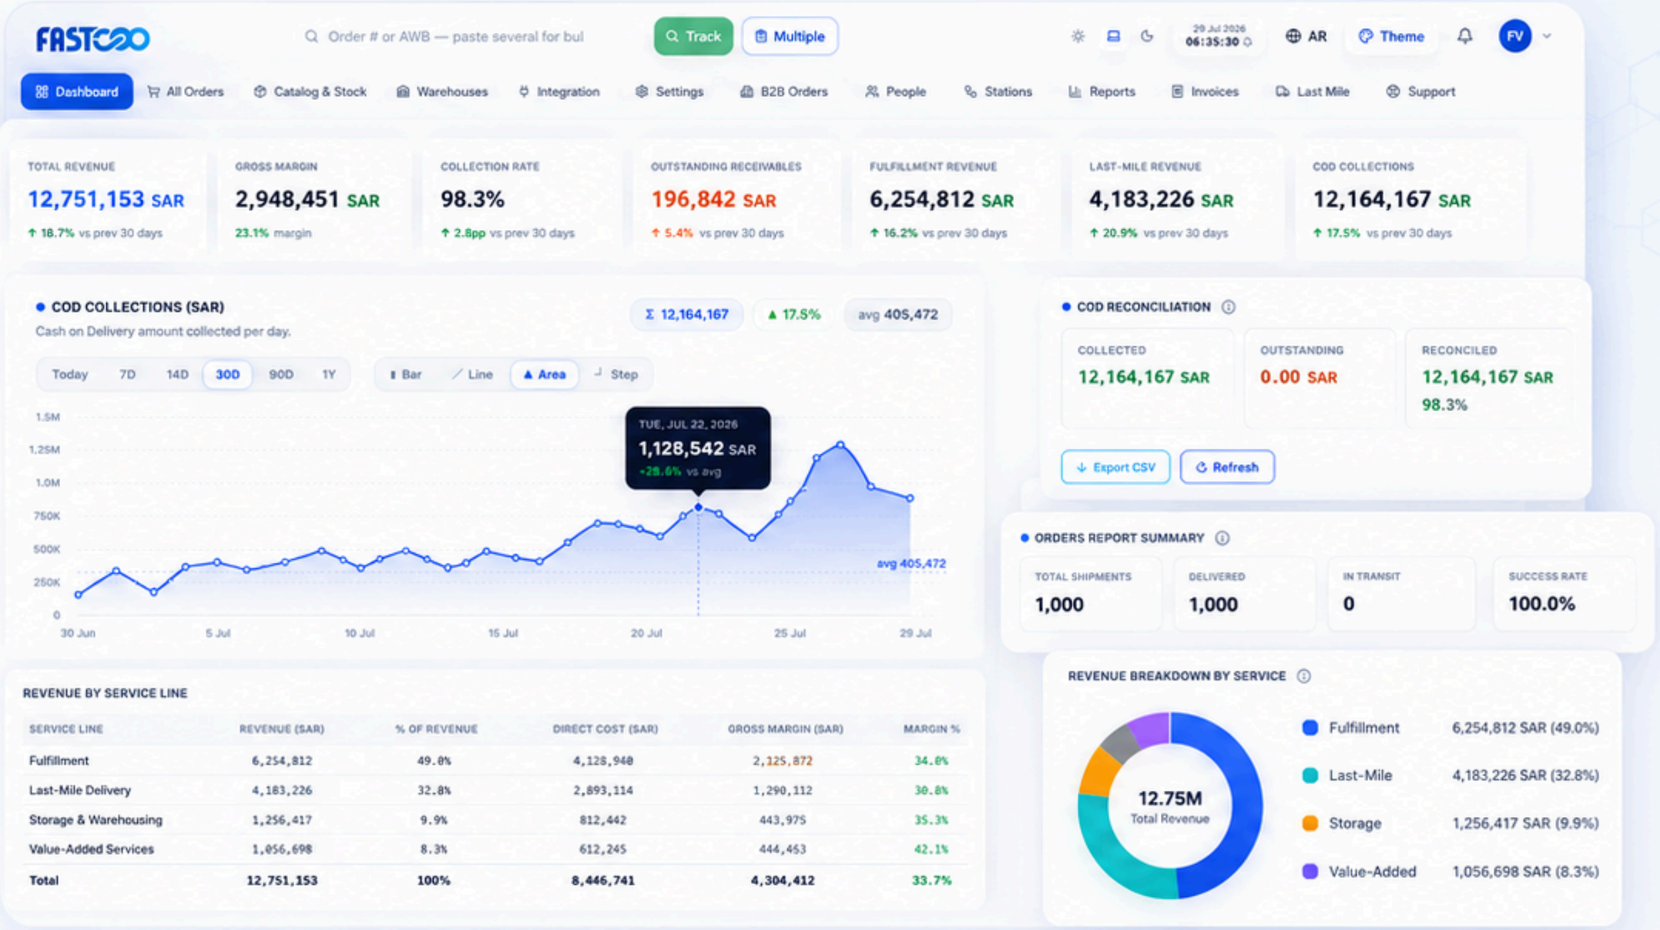

Compare revenue, direct cost, and margin by client and service line.

COD & Collections

Track collected, outstanding, reconciled, and aging balances in real time.

Operational Cost Visibility

Understand cost per order, warehouse, seller, and operation.

GROSS MARGIN
23.1%
↑ 2.8pp vs prev 30 days

REVENUE PER ORDER
1,275.12 SAR
↑ 14.6% vs prev 30 days

COLLECTION RATE
98.3%
↑ 2.8pp vs prev 30 days

OUTSTANDING RECEIVABLES
196,842 SAR
↑ 5.4% vs prev 30 days

FULFILLMENT REVENUE
6,254,812 SAR
↑ 16.2% vs prev 30 days

Not just operational data. Clear financial control.

Connect Every Store.
Scale Every Operation.

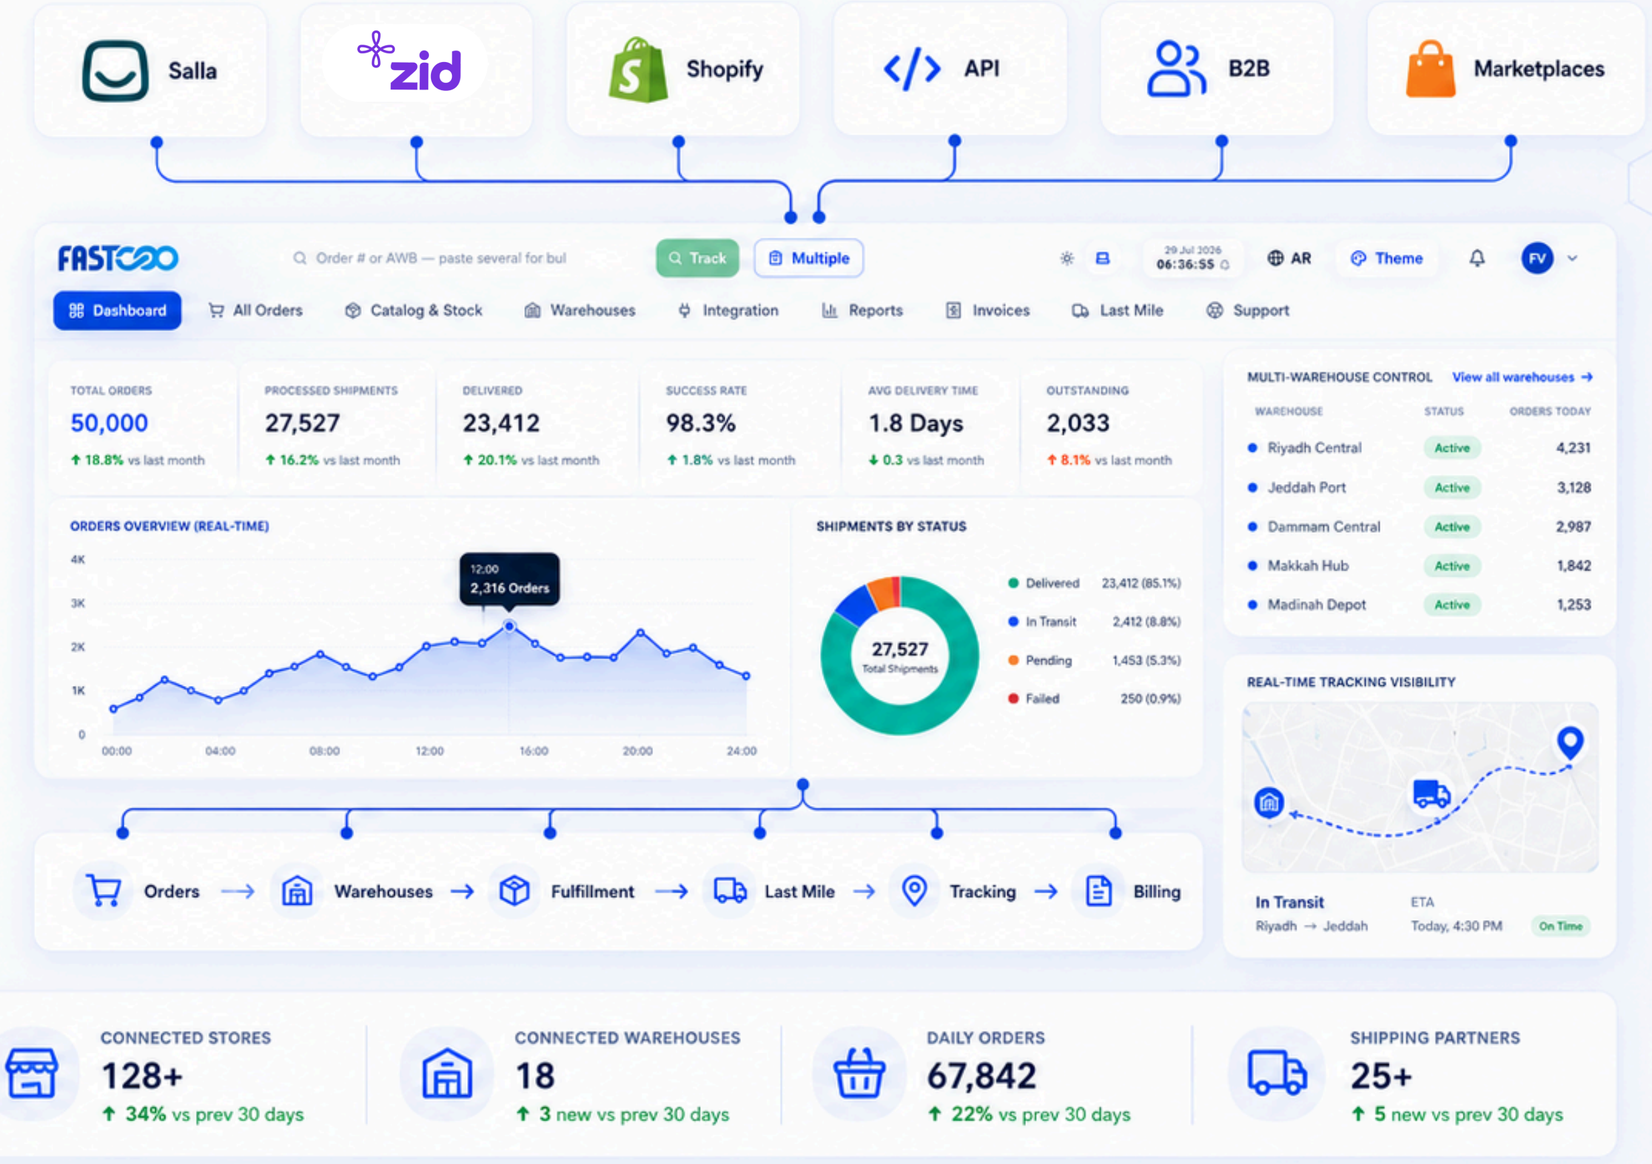

One seller can manage multiple stores, warehouses, channels, and markets from one connected platform.

Multi-Store Integration
Connect Salla, Zid, Shopify, API, marketplaces, and manual channels.

One Unified Order Stream
All orders flow into one account for fulfillment, reporting, and billing.

Multi-Warehouse Expansion
Operate several warehouses and dark stores as one connected network.

Built for Scale
Support more volume, more cities, more clients, and cross-border growth.

CONNECTED STORES
128+
↑ 34% vs prev 30 days

CONNECTED WAREHOUSES
18
↑ 3 new vs prev 30 days

DAILY ORDERS
67,842
↑ 22% vs prev 30 days

SHIPPING PARTNERS
25+
↑ 5 new vs prev 30 days

Add more stores. Add more warehouses. Keep one system.

Built for Cross-Border Logistics.

Manage international order flows, customs stages, returns, and multi-country fulfillment from the same platform.

End-to-End Visibility

Track every international shipment through warehouse, customs, and delivery stages.

Multi-Country Operations

Manage warehouses, sellers, and orders across different markets.

Cross-Border Returns

Handle failed deliveries and returns through a controlled reverse flow.

One Unified Order Record

No separate system for international shipments.

Origin Warehouse → Export Customs → Departure → Destination Facility → Import Customs → Last Mile → Delivered

RTO in Transit → Returned to Origin → Inspection → Restock

Countries	Cross-Border Orders	On-Time	Return Control
7+	18,240	97.8%	Enabled

One platform for local, regional, and cross-border operations.

Why Fastcoo V5 Pro

A unified logistics platform built to give operators more clarity, control, and scalable execution.

One Unified Platform

Warehouse, orders, inventory, last mile, tracking, finance, and AI in one connected system.

Built From Real Operations

Designed around real logistics workflows, daily operational pressure, and field experience.

Live Control

Real-time visibility across warehouses, teams, orders, and SLA performance.

ONE SYSTEM

AI-Powered Execution

Detects risks, recommends actions, routes tasks, and follows up until closure.

Ready to Scale

Supports multi-warehouse, multi-store, dark store, retail, and cross-border growth.

Financial Visibility

Understand revenue, margin, costs, and collections with greater clarity.

Clarity. Control. Automation. Visibility. AI Agents. Execution.

FASTOO | V5 Pro

Turn 3PL Data Into Clear Decisions.

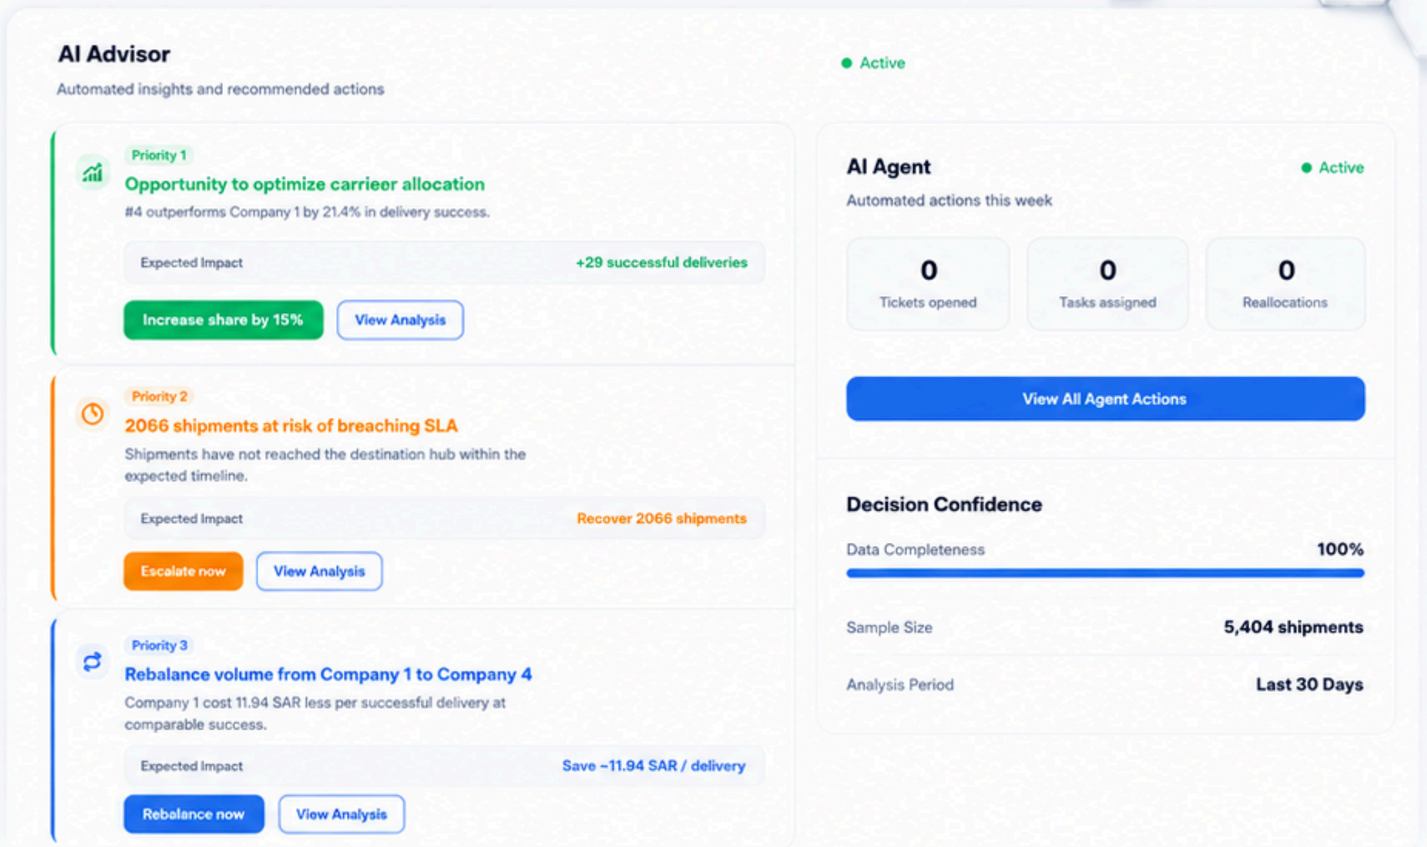

Track carrier performance, identify issues, ask the 3PL AI Chat, and let AI recommend actions and assign tasks.

3PL Performance
Compare carriers by speed, success, SLA, and returns.

AI Decisions
Detect risks, cost leaks, and better allocation opportunities.

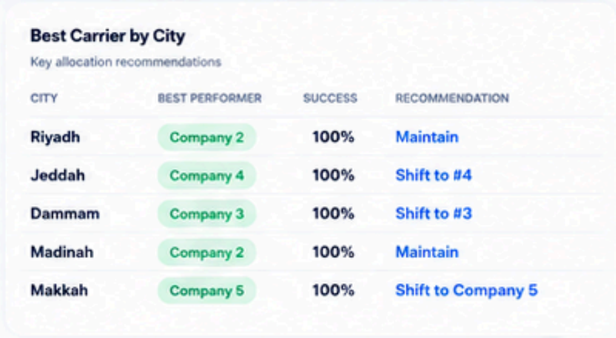

Manager AI Advisor
Alert managers to issues and recommend the next action.

3PL AI Chat & Tasks
Ask questions, assign responsibility, and follow up to closure.

From monitoring to action — one intelligent operational flow.

FASTCOO | V5 Pro

Every Manager Gets an AI Advisor.

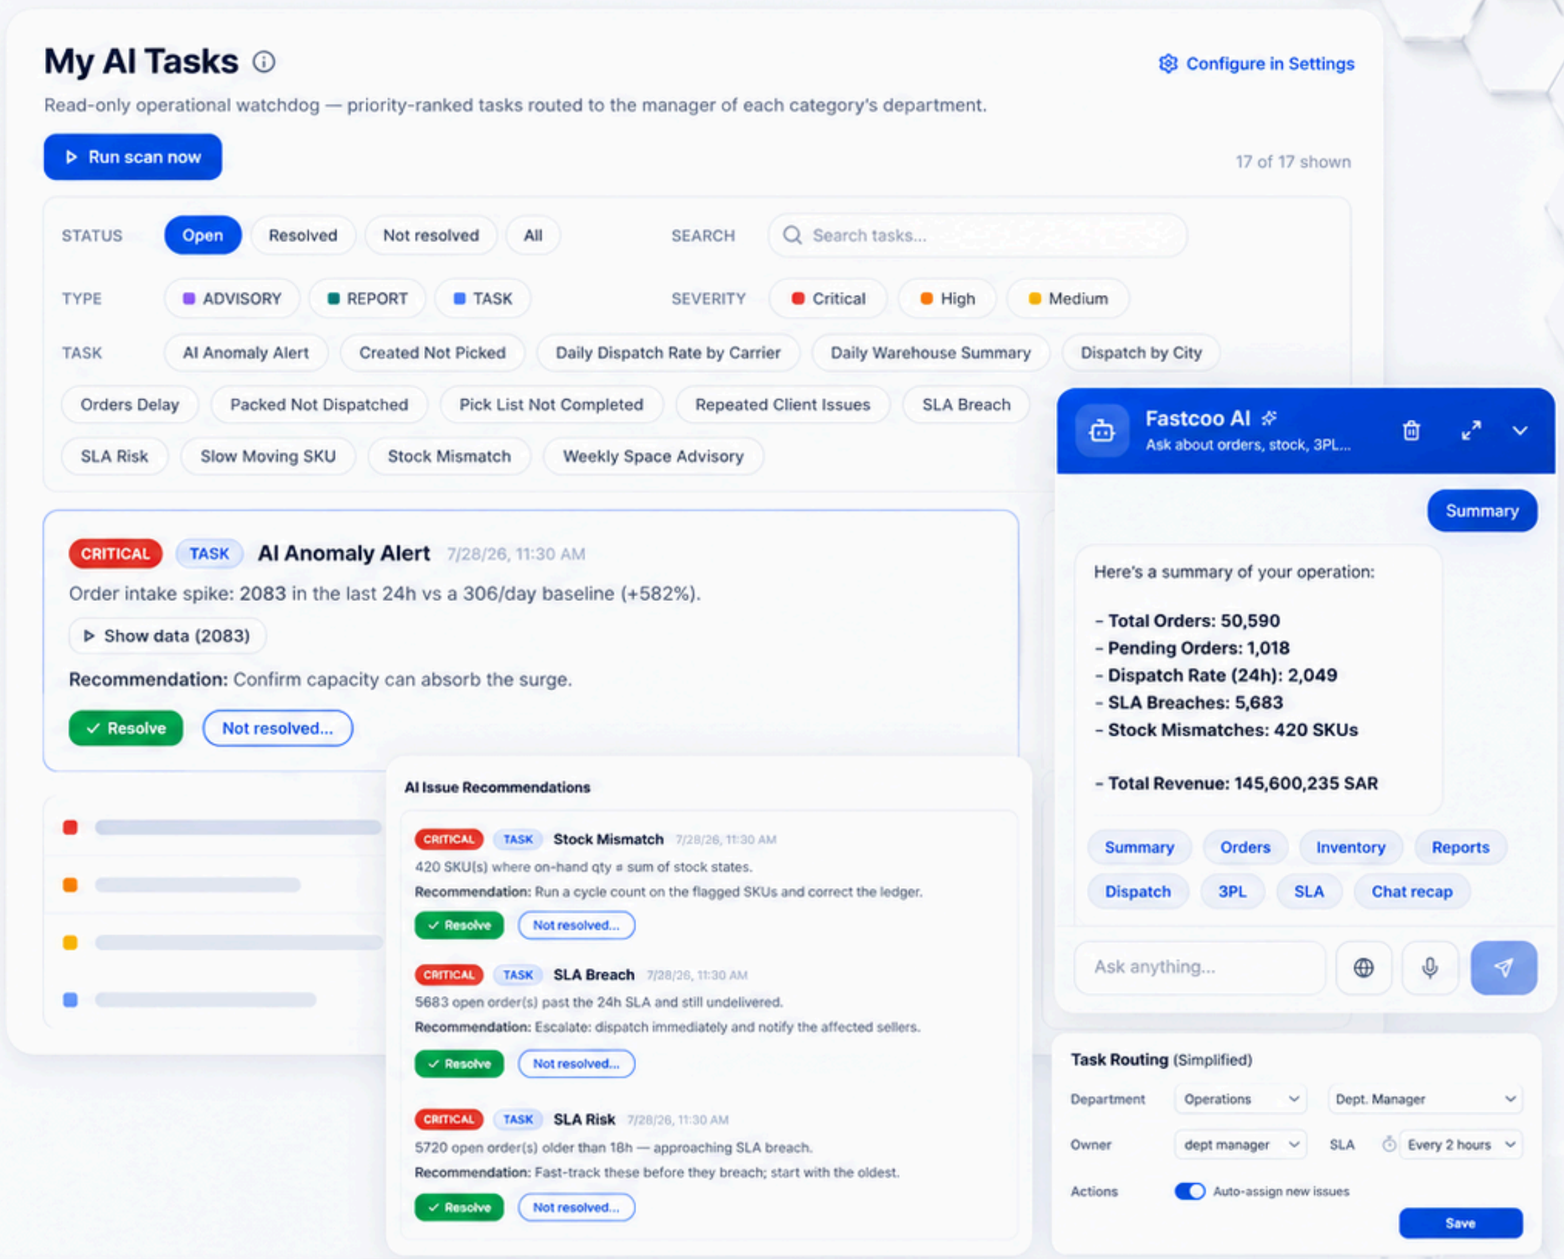

Fastcoo AI detects issues, recommends actions, routes tasks, and answers operational questions instantly.

Operational Watchdog
Detect delays, SLA risks, stock mismatches, and productivity issues.

AI Task Routing
Assign issues to the right manager or department automatically.

Action Recommendations
Show the problem, its impact, and the next recommended action.

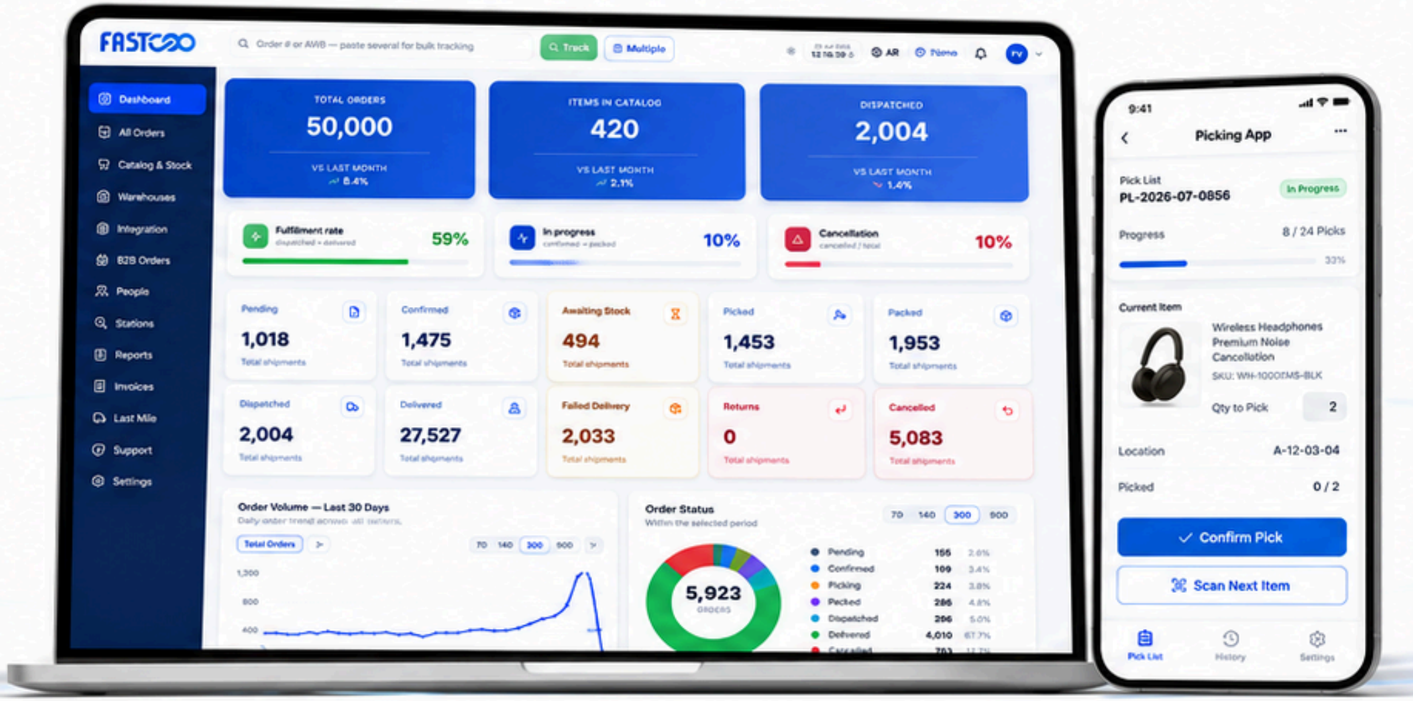

Fastcoo AI Chat
Ask about orders, inventory, 3PL, dispatch, and reports in seconds.

Every issue detected. Every task assigned. Every answer available.
